

Did you leave a bracket open?
Did you miss a semicolon?
Was there something you misspelled?
It's a little hard to tell...

You may look through all your code and
Still not know what else to try.

Your code worked or was broken;
Either way you don't know why...

Coding can be challenging,
That much is plain to see.
But you should know your programming
Is super cool to me!

Happy
International Programmers'
Day!
